### Harvest 2024

The winter of 2024 in the Vinho Verde region experienced the highest average temperatures since 1931, but the rainfall at the beginning of the cycle helped to replenish the soil's water levels. Spring brought more rain, providing the necessary water for the vine cycle. The summer was hot and dry, but without extremes, favoring the ripening of the grapes. With immense quality, the result of very balanced ripening, this harvest resulted in wines with good presence, structure and a rich and persistent aromatic nature, combining minerality and fruit.

### Winemaking Process

Produced from the most expressive grape variety of the Vinhos Verdes Region, this single varietal is the result of a unique viticulture model that allows greater concentration of aromas and sugars in the grapes. The harvest is at night to ensure the freshness of the grapes and the preservation of their aromatic properties. The grapes are gentle pressing at low pressure and alcoholic fermentation takes place at controlled temperatures.

### Tasting Notes

**Color** | Pale lime green.

**Aroma** | Reveals notes of elderflower and chamomile with hints of lime leaf.

**Taste** | Smooth and mineral with fruity notes of melon and passion fruit, and a lively, crisp finish.
